

ENGAGEMENT CASE STUDY

India's Leading Manufacturing, Distribution & Testing Provider Successfully Implements D365 Business Central Online

ABOUT THE CUSTOMER

Organization is a part of 115+ years old business group based out of Bhopal. Firm believes in ethical business, they ensure that their values remain intact and that they provide the most satisfying supplies to the consumers. The company today has automated and semi-automated, modern manufacturing and advanced testing facilities in India, Sri Lanka, Philippines, and Nepal.

BUSINESS CHALLENGES

The order fulfillment across the entire supply chain network was developed in SAP and was so far being controlled and managed by the organization's customer. They wanted to replace it to meet their own requirements and have more control on supply planning rather than being driven by their customer. To solve this, we have now implemented a first of its kind business model, wherein supply chain planning has been implemented by the organization itself with real time visibility of inventory availability across order networks.

HIGHLIGHTS

Industry:

Manufacturing

Project Location:

India

Engagement Since:

2021

Solution Snapshot:

- First of its kind business model
- Rapid development of D365 Business Central Online
- 100% offshore implementation
