

Godrej Infotech successfully implements ERP FP5 for JC Valves, Sharjah. JC Valves is an internationally renowned brand of industrial valves. JC strives to be a “one-stop” world-wide supplier for all valve requirements, be it for applications requiring Gate, Globe, Check, Ball, Butterfly or Plug valves. JC has invested in the development of new products, quality assurance and protection against harmful emissions in order to assist customers in safely controlling their fluids. With a track record of supply spanning over fifty years, JC has developed an enviable reputation for quality & reliability of product at competitive prices.

Godrej Infotech (GITL) successfully implemented ERP Ln FP5 for JC Valves. GITL completed this task in just 6 months of time which was less than the timeline projected for the completion of this project. JC Valves is the first site to be on Feature Part 5(FP5). There were many other features that were custom made according to the requirements they had. GITL along with its project implementation team is proud to announce JC Valves site to Go Live.
