Unlock Digital Growth

Architecting AI-Powered Transformation

## About Godrej Infotech

Godrej Infotech, a part of the \$2B Godrej Enterprises Group, has established itself as a powerhouse in delivering end-to-end IT solutions over the past 25 years. With deep domain expertise across industries—from manufacturing to healthcare—we empower businesses worldwide through cutting-edge, AI-powered technologies.

Our comprehensive portfolio includes advanced solutions in Generative AI, Agentic AI, Robotic Process Automation, Enterprise Resource Planning, Business Applications, Cloud Services, and Application Modernization. These offerings are designed to drive innovation, enhance operational efficiency, and unlock new avenues for scalable growth.

# Industry Expertise

## Manufacturing

Automotive, Discrete, Industrial, Engineering & Process Manufacturing

## Retail & Distribution

Retail Stores, Duty-free, Super & Hyper Market, Travel Retail and Hospitality Businesses

## Projects

Real Estate, Industrial Setup, Turnkey Infrastructure, Shipbuilding & Small-Scale Machine Building

## Healthcare

Pharma Manufacturing & Distributors, Health Facilities, Medical Equipment and Supplies

# Strategic Partnership

# Accelerators

## Industry 4.0

RPA: Streamline repetitive and labor-intensive task of item code & BOM creation and reducing manual workload by increasing accuracy of master data.

## GITL Cloudscape Align

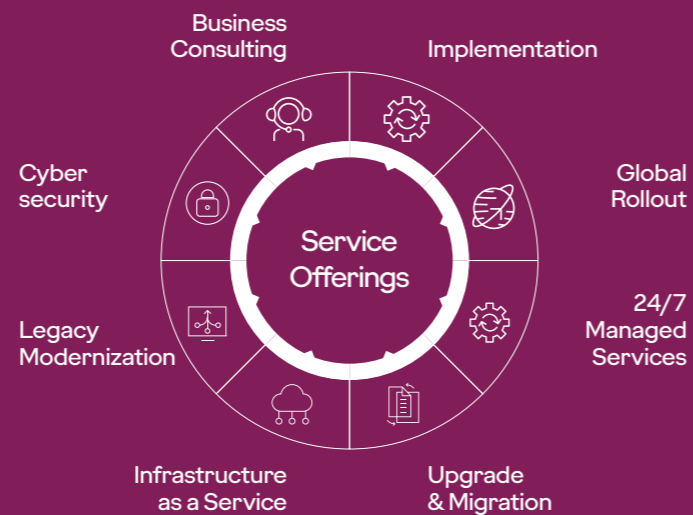

Cloud migration planner addressing data migration strategies, application compatibility, network architecture and security protocols.

## Dealer Management

Developed using .NET technology and integrated with ERP, this solution eliminates manual data entry, streamlines processes and provides accurate information.

## Production Quality Optimization

Preconfigured quality parameters integrated at various stages of the production process extending to Bill of Material.

# Project Highlights

## Leading building materials & plastics converter manufacturer in the US enhances response time by 50% with Salesforce Agentforce

- Revenue: \$965 million
- Enhanced productivity through a custom setup using pre-built AI templates tailored to specific operational needs
- Improved response time by 50% and reduced service tickets by 20% with automated resolution of common issues

## Prominent Manufacturing & Design Company in India Cuts Operational Costs and Boosts Efficiency with RPA

- Revenue: \$150 Million
- Automated workflows using UiPath Comm. Path and Doc Path to streamline repetitive tasks
- Enabled alerts and collaboration via Twilio, Slack API, and IVR integration
- Leveraged Generative AI to automatically generate training manuals, root cause analysis reports, and incident tickets

## Europe-based Global 3PL Leader Reduces Costs and Manual Effort with AI-Powered Computer Vision

- Revenue: \$350 Million
- Accelerated packing and verification using deep learning-based AI computer vision to detect and count items within seconds
- Enabled barcode scanning, text recognition, and object identification

## Large Banking & Insurance Company with Global Presence Enhances Operational Processes with AI solution

- Revenue: \$250 Million
- Accelerated customer onboarding by automating forgery detection across identity documents
- Eliminated unauthorized transactions and reduced manual effort in identifying near-duplicate or manipulated documents

## KSA's Leader in Rental & Equipment Achieves After-sales Service Operational Excellence with Infor M3 ESMR

- Revenue: \$741.4 Million
- Minimized unexpected equipment failures and unplanned downtime by automating maintenance scheduling
- Implemented cloud-based tracking system for real-time monitoring of equipment usage, location and availability
- Strengthened client relationships and improved service transparency through timely updates and communication
